BALL JOINT AND KING PIN KITS

- Ball joint kit is sold per A-arm and comes with snap ring and cotter pin
- King pin kit (used in applications where a king pin was used rather than a ball joint) includes all bushings, pins and seals needed for repair
- Ball joints feature heavy-duty steel cases with POM-M90 bearing material for long life
- Put an end to premature Honda ball joint failure by upgrading from the OEM aluminum joint to our heavy-duty steel joint
- Inexpensive replacement for those Kawasaki and Suzuki applications that otherwise require purchase of a complete A-arm or steering knuckle

SHOCK REBOUND SEPARATOR VALVES

- Replace the stock shaft nut with an asymmetric valve to offer different flow rates for compression and rebound
- The stock low-speed rebound adjuster flows at the same rate during compression and rebound, which makes the lowest speed damping too mushy, causing bottoming and an unresponsive feeling during long-duration hits; shock rebound separator valves correct this issue

UPPER AND LOWER A-ARM UPGRADE KIT FOR KAWASAKI BRUTE FORCE

- OEM design incorporates small spherical bearings that carry the load of the entire front end
- Over time, spherical bearings become loose and external seals break due to excess play and that allows contamination to pass into the assembly
- Upgrade kit contains acetal thermoplastic bushings and hardened ground pins for the entire front end of the machine

VALVES, GUIDES AND SPRINGS

- Black Diamond™ valves feature one-piece stainless steel construction with stellite tips and special impregnation to improve wear properties and reduce friction; White Diamond® valves feature one-piece construction and hard chrome stems
- Valve guides are made of Ampco-45, a high-performance compound with 80% copper for great heat conductivity and 5% nickel for wear resistance (unless noted in chart)
- Some valve guides are C674 bronze guides, a softer Manganese guide that can be more easily reamed and finished with a high-grade quality ball hone and battery-operated electric drill (see chart)
- Spring sets contain springs and titanium upper collars; keepers and lower collars included as required
- Valves and guides are sold each; spring kits come complete for one motor

VERTEX PISTON POWER

TITANIUM REPLACEMENT VALVES

- Crafted from military-spec certified Ti3Al titanium alloy, these valves are made to endure the harshest racing conditions
- Forged from a single blank, grain flow is improved to enhance the mechanical characteristics of the valve without having to resort to welding
- Special PVD, CVD and CrN coatings are used to provide low-friction surfaces that reduce heat generation and resist carbon build-up; coatings allow alloys like titanium to become ultrasmooth while reaching hardness levels 5x that of high-speed steel

IRON ALLOY VALVE SEATS

FOR STEEL VALVES

- Premium valve seats for applications using steel valves
- A specific combination of alloys allowed a creation of high density, iron-based valve seat with uniform hardness, exceptional thermal qualities and high resistance to wear and recession caused by microwelding
- Only by using the latest developments in powdered metal technology were we able to blend these alloys to give a seat material with the qualities required for today's engines
- These seats have been tested on the track and street in high rpm applications with leaded, unleaded and oxygenated fuel, as well as methanol, ethanol, nitrous and forced induction applications
- Sold each

NOTE: All applications listed use two intake and two exhaust seats unless otherwise noted.

NOTE: The seats listed below are only recommendations for specific applications. Always measure your application and have the valve seats installed professionally.

PISTON KITS, RINGS, WRIST PINS AND CIRCLIPS

- All pistons are heat-treated with a T-5 hardening and tempering cycle
- All piston skirts are coated with a high-tech molybdenum disulphite coating for faster break-in time and increased piston life
- Cast piston kits are gravity-cast aluminum alloy (not forged) with 18% silicon content, which produces an extremely light but very strong piston
- Forged pistons are forged from 2618 aluminum for superior strength and durability
- Forged High Compression pistons improve power and torque across entire rpm range
- Big Bore pistons increase engine's displacement, torque and peak horsepower
- Forged Replica pistons are forged OE replacements
- Replica pistons and all rings are OEM replacements
- Kits include piston, rings, wrist pin and circlips
- Replacement two-stroke piston rings sold individually; four-stroke piston rings sold as a set as needed

NOTE: Top end kits include piston kit and a top end gasket kit, top-end bearing and cam chain.

NOTE: Vertex piston rings fit Vertex pistons only.

- Two-stroke pistons are made from 4032 silicium
- Four-stroke pistons are made from 2618 silicium – the same material used to produce Formula 1 pistons
- Both include 3% copper in materials for better heat resistance
- All pistons are forged using a precision heat-treatment process that allows for production tolerances of just 0,005 mm
- Most piston kits are available in A or B sizing
- Kits include antiwear coated piston, rings, pin and circlips

CLUTCH AND STATOR COVER GASKETS

- Clutch and stator cover gaskets are made from an AFM Material which is a chemically blown, compounded nitrile synthetic rubber bonded to an aluminum core
- Aluminum core gives the gasket strength for a superior seal and prevents the gasket from weeping or crawling out in today's engine cases with limited sealing surfaces
- No sealants required for installation
- Save service time as AFM will not stick to the engine case, making replacement quick and easy; no more scraping

VALVE COVER GASKETS

- Valve cover gaskets are made from application-specific materials to ensure longevity and correct fitment for a leak-free seal
- Provide quality, high-tech sealing solutions at a lower cost than the OEMs

CK Series

Clutch Spring Set

CLUTCH KITS AND CLUTCH SPRINGS

CK STANDARD SERIES CLUTCH KITS

- Cork-based clutch material impregnated with aluminum particles to increase wear life and heat resistance
- Highly compressed construction avoids swell and clutch drag
- Ideal for general-purpose street/sport/touring bikes
- Kit includes complete engine set of friction plates only

CKF SERIES CLUTCH KITS

- Kits have carbon-fiber impregnated friction plates
- Tough clutch plates extend engine life, improve drive, increase the heat threshold of the clutch and improve rider feel
- Available for select applications, see chart

DRC SERIES CLUTCH KITS

- Anti-swell, alloy-impregnated heavy-duty cork-based facings for smooth clutch take-up
- Allow modulation, unlike paper clutches that tend to snatch
- Complete engine set of friction plates, HD springs and steel separator plates prevent premature driven plate wear, oil muddying and loss of stack height
- Built with swagged aluminum carriers that spread the load on the clutch basket and prevent clutch basket "dogging"

DRCF SERIES CLUTCH KITS

- Heavy-duty clutch kit designed for hard use and race applications
- Feature carbon-fiber lined clutch friction plates, a full set of steel plates and heavy-duty clutch springs
- Ideal for use in 4-stroke, high-torque engine applications; great upgrade for 2-stroke performance applications

CSK CLUTCH SPRING SETS

- It is recommended you replace springs when changing clutch plates
- EBC springs are 10% stiffer than stock
- Sold in engine sets
