CHAINS

Moose Offroad chain is made through an exclusive contract with a top European supplier. Moose Offroad is in a state of constant development to bring you better chain at a competitive price. The recently developed FB technology is now proven. As the FB continues to impress, the development is paying dividends through the entire range of chains.

520 FB O-RING CHAIN

- This is the top of the line – the strongest, most durable sealed chain Moose Racing offers
- FB = Fine Blanking, an incredibly precise manufacturing process that yields perfectly cut links
- Tight tolerances make the plate, pin and bushing union accurate and strong
- Due to the accuracy of the cuts and the use of stronger alloyed steel, the FB has our highest tensile strength rating, nearly 3629 kg (8000 lb)
- Special sealing rings are chemically treated to gain strength and reduce friction
- The FB treatment allows the O-rings to be impregnated with grease
- FB rings are stronger and more durable than X-rings, with significantly less friction
- Gold links and rollers, silver inner plates, pins and bushings
- Clip-type connecting link included
- Recommended for applications 450 cc and above
- Replacement connecting link available

BRAKE PADS

SINTERED METAL

- Offers a powerful initial bite and optimal wear resistance in extreme conditions
- Provides a progressive feel at the lever and offer high thermal stability up to 600 °C/1000 °F; no fading on high-speed downhills
- 100% compatible with OEM stainless steel rotors, but are designed especially to match Moto-Master brake rotors in performance and feeling
- Bedding-in time is low as optimal pad/disc contact is achieved after eight to 10 stops

11 COMPOUND

- All-around sintered pad for off-road and MX competition with a high performance/wear ratio
- ECE-R90 approved

12 COMPOUND

- Provides 30% more friction than 11 compound
- Designed for professional MX, SX and supermoto racing with high thermal resistance and excellent initial bite
- Not ECE-R90 approved

21 COMPOUND

- Sintered, high temperature- and wear-resistant pads are ideal for wet MX, Enduro and Rally Raid use
- Not ECE-R90 approved

22 COMPOUND

- Sintered, high temperature- and wear-resistant racing pads
- Not ECE-R90 approved

STAINLESS STEEL BRAIDED BRAKE LINES

- Swivel union ends are the secret to easier fitting, and ensure a kink- and stress-free installation
- Venhill Engineering in the UK makes Moose Racing Stainless Steel Brake lines to the highest specifications
- Each line is made from top-quality PTFE-coated hose, wrapped with British-made stainless steel and PVC-coated for protection and great looks
- Rubber protection boots and extra rigid tubing are used to protect vulnerable areas from heat and impact and to prevent hose flex under compression
- Each line is designed to withstand a minimum of 14.000 psi
- Installing our stainless lines gives a large performance increase by significantly reducing expansion under pressure, and absorption of water when compared to stock rubber hoses

WHEEL SPACERS

- Replace or upgrade OEM wheel spacers with these durable replacements
- Water and dirt grind between wheel bearing seals and soft OEM aluminum wheel spacers; this creates grooves and allows for bearing contamination
- Moose Offroad wheel spacers feature hardened steel contact surfaces
- This makes for a tight seal that will last for years and keep your bearings fresh
- Our spacers are made from either anodized aluminum with a press fit – hardened steel shell, or solid - hardened and ground bearing steel, depending on application
- Upgrade to Moose Offroad wheel spacers when you replace damaged wheel bearings, or before you have to
- Kits come with two spacers, unless called out in catalog
